WHY NOT GO THE EXTRA MILE?

That's the approach Robinson Restoration and Service feels is such an important part of what we're about.

BLACK and ROUND

For those wishing to complete an "as original" vehicle restoration, there's continued good news. To complete the look of original tires that play a huge roll, Cooker Tires has an amazing selection of period correct tires to select from.

With fitments from Model "T" to current muscle car, they've got what you're looking for. While on the topic we should add that most collector vehicles are usually driven very little and as such, a person should inspect them closer. Check for correct pressures, valve stem and sidewall / tread condition before hitting the highway for the next car show. If you're in the Denton, Texas area, stop by RRS and they will inspect them for you.

CLEAR WINDSHIELD FOR BETTER INFORMATION.....

We continue to put a high value on drivers getting the best information possible as they run down the highway using 100 feet of pavement every second. Very little thought is given to the critical windshield wiper whose job it is in driving rain to permit the best possible view of road and traffic conditions.

Amazing engineering effort has gone into improving the performance of wipers and the outcome has been spectacular. Recent testing with the new Rain-X blades reviewed have surprising results. They're not cheap but, wow do they work. Consider it a solid investment on protecting you-and-yours.

DON'T JUST DUST IT, CHECK IT

We can't wait to hit the Cars and Coffee events, and of course, rallies and full-on car shows are a blast too, but if your beloved toy has been sitting for a few months, you really should give a deep dive once over to be sure all is well.

Brake fluid builds moisture and coolant can expire while just sitting, tires leak air, engine and trans build, wonder to God who only knows what. Any of these can bring your happy outing to an abrupt end. Set up a full safety inspection with RRS, a better investment you cannot make.

SHOWTIME.....

It's that time of year again and lots of shiny paint jobs are seeing their first rays of sunlight since fall. The "Show Season" always kicks off with great events and proud owners anxious to show off their pride-n-joys, some just recently completed.

Having just attended a high-profile VW show as well as accepting an invitation to attend the largest of all Ford shows Celebrating its 38th year, I feel the excitement. "Fabulous Fords Forever" is a west coast monster of a show that brings out everything you can think of that's a Ford. Great mix of vehicles this year including an 1/8 mile drag race at lovely Irwindale, California facility.

Perfect weather and a huge crowd made for a very fun day. We were lucky enough to be invited as a VIP guest that included some truly big names from racing's past and present.

Always a joy to see Lynda Vaughn, Lyn St. James, current Ford factory driver Joey Hand, OVC's Jim Marietta and Ted Sutton (original Shelby American wrenches), Steve Saleen and Cleo Shelby. We signed autographs for nearly two hours with most folks, having no idea why I was in the line and then enjoyed a great lunch provided by Ford Motor Co.

PAY ATTENTION TO CALL FOR "SOLD"

With auction season just starting and the economy in a very tenuous state it's a good time to watch auto auctions to get a measure on how collectors & investors are spending their money.

The auction day and the vehicle closes will tell you a lot. Remember, Friday is the lower priced vehicles and by Saturday night the big money hardware comes out.
